Portfolio

akash-nion.github.io

Location

Dhaka, Bangladesh

TECHNICAL SKILLS

Programming

Python • R • SQL • C • Fortran • MATLAB

Machine Learning

Regression • Classification • Clustering • Model Evaluation

Libraries

NumPy • Pandas • Scikit-learn • TensorFlow/Keras • Matplotlib • Seaborn

Databases

SQL • Neo4j • Cypher

Data Prep

Feature scaling • Encoding • Outlier detection (IQR, Z-score)

CERTIFICATIONS

R for Applied Statistics & Data Science

ISRT, University of Dhaka

Python for Data Science, AI & Development

Coursera

LANGUAGES

English

IELTS Overall 6.5

Bengali

Native

STRENGTHS

Fast learner • Analytical thinking • Clear communication • Team collaboration

Nion Rahaman Akash

Aspiring Data Scientist | Machine Learning Enthusiast

PROFESSIONAL SUMMARY

Data Science graduate (Postgraduate Diploma, 2024) with a Mathematics background and a hands-on portfolio of applied machine learning projects spanning healthcare risk prediction, price forecasting, NLP, and customer analytics. Comfortable across the full workflow — data cleaning, feature engineering, model building, and evaluation — using Python and SQL. A fast learner looking to bring strong analytical thinking and a genuine curiosity for data to an entry-level Data Scientist or Machine Learning Engineer role.

FEATURED PROJECTS

Diabetes Risk Prediction

Personal Project • Python, Scikit-learn, TensorFlow/Keras

- Built and compared Logistic Regression, Random Forest, and a neural network to classify diabetes risk from patient health data, reaching 75% accuracy
- Engineered features and applied statistical feature selection (ANOVA F-test); evaluated with precision, recall, and F1 to account for class imbalance

Car & Laptop Price Prediction

Personal Project • Python, Scikit-learn, Pandas

- Built end-to-end regression pipelines (Linear, Ridge, Random Forest, Gradient Boosting) with a full data-cleaning process, reaching 0.75 cross-validated R^2
- Identified and fixed a target-leakage bug and applied log-transformation to handle skewed price data, using 5-fold cross-validation for robust comparison

Breast Cancer Classification & Digit Recognition

Personal Projects • Python, Scikit-learn

- Applied Support Vector Machines (SVM) for tumor classification and Random Forest / K-Nearest Neighbors for handwritten digit recognition

Spam Detection & Customer Segmentation

Personal Projects • Python, NLTK, Scikit-learn

- Built an NLP pipeline (Bag-of-Words, Naive Bayes) for spam and sentiment classification, and applied K-Means clustering with RFM analysis for customer segmentation

Full code, write-ups, and results: github.com/Akash-Nion

EDUCATION

Postgraduate Diploma (PGD) in Data Science

United International University (UIU), Bangladesh • 2024 • CGPA 3.44/4.00

B.Sc. in Mathematics

University of Rajshahi, Bangladesh • 2016 – 2022 • CGPA 2.96/4.00

EXTRACURRICULAR & LEADERSHIP

- Volunteer, Transparency International Bangladesh (TIB)** — conducted primary data collection and supported evidence-based governance research (2021–2023)
- Active Member, University of Rajshahi English Speaking Club** — led communication workshops and collaborative learning sessions
